to Kaibab Park.

COULD BE EASILY FENCED JAP USES KNIFE ON HIM

Among those interested in the efforts to induce (President Roosevelt to set aside a national game preserve embracing about 2,500 square miles, in the Kaibab park country, is former Senator 'Quil' Nebeker of Laketown, Ariz. The proposed preserve takes in part of the territory already set aside in the Coconino forest reserve and lies in the Utah line and the Grand Canyon of the Colorado, according to Senator Nebeker. It has natural boundaries on three sides, the Kanab canyon on the west, the Grand Canyon on the east. The erection of about fifteen miles on that region would probably prove a sufficient boundary without the erection of a fence.

Mr. Nebeker arrived in Salt Lake City from his Rich country ranch yesterday and gave an interesting description of the region which he believes should be converted into a game preserve.

"The territory involved is, roughly, fifty miles by lifty miles square," said Mr. Nebeker. "It is unique in that the counter it is stared will show the range, with hundreds, of good springs, many mountain lakes and an abundance of timber. It now contains more deer than any other section of the United States, I believe, and would be a natural home for antelope, eft and buffalo. There are a few antelope and mountain sheep there now in addition to the deer. It embraces the Kaibab, or Buckskin, plateau, with an altitude of from 7,000 to 8,000 feet. The plateau holds large quantities of snow, but in the valleys of an altitude of some formatices of the first plateau holds large quantities of snow, but in the valleys of an altitude of some formatices and outing of Keith-O'Brien embrous for the plateau holds large quantities of snow, but in the valleys of an altitude of some formatices and outing of Keith-O'Brien embrous for the region which of the region which he believe, and an abundance of timber. It now contains more deer than any other section of the United States, I believe, and would be a natural home for antelope and mountain sheep there now in addition to the deer. It embraces the Kaibab, or Buckskin, plateau, with an altitude aside a national game preserve embrac-

valleys of an altitude of about 1006 feet. The plateau holds large quantities of snow, but in the valleys he snowfall never lasts long, so that hey would be all right for winter ange. Rainfall is abundant. Deer in orge numbers drift into the country on Utah and once in they never ave, because it is an ideal home for

The country is a natural park. It is splendid for grazing purposes, but has no agricultural value. Individual rights in it could be secured by the rights in it could be secured by the government with less trouble and expense than has been entailed by the creation of any of the forest reserves, I think. So far as I know, B. F. Saunders of Salt Lake is the chief owner of rights in the country, his rights being mainly in the form of springs and pine lines.

"I believe this could be made the greatest game preserve in the country.

greatest game preserve in the country. It would easily support 100,000 animals, enough to last forever with proper re-

strictions as to hunting."
Mr. Nebeker says "Buffalo" Jones, game superintendent of Yellowstone park, is now in Coconino county investigating the proposition for the purof making a report to the presi-

## HAY FEVER FOR 27 YEARS

Well Known New England Woman Cured of Hay Fever-Cure Was

The thousands of discouraged people who dread the approach of summer because they have hay fever and cannot find any relief from it, will read with interest and gratitude the following statement from Helen S. Williams of Mansfield, Mass.:

"For twenty-seven years, from the month of August until heavy frost, I have been afflicted with hay fever, growing worse and worse each year, until of late years I was unable to attend to my work during that period.

"Last summer I fortunately gave Hyomei a trial, and I am happy to say that it entirely cured me, and I have had no occurrence of the disease

fever sufferer who uses Hyomei with
